OBJECTIVE

Full stack developer with an experience of 1+ years buliding application in Mongodb, Reactjs , Expressjs , NodeJs (MERN) and integrating third party services

PROFESSIONAL EXPERIENCE

Full stack developer

02/2024 – 05/2024

Bonaysys IT solutions

- Developed and Maintained CMS Designed and implemented both the frontend and backend of a dynamic Content Management System (CMS) using modern frameworks like React.js and Node.js, ensuring seamless content updates and a responsive interface.
- Enhanced Performance by 15% Optimized the CMS by refactoring code and implementing caching strategies, reducing load times and improving the overall performance by 15%, ensuring faster content delivery for users.
- Collaborated with Cross-functional Teams Worked closely with product managers, designers, and DevOps teams to ensure the smooth deployment of the CMS, focusing on scalability and reliability to handle increased traffic and content updates.
- Streamlined Deployment and Scaling Utilized containerization tools like Docker and CI/CD pipelines to streamline the deployment process, ensuring faster releases and the scalability of the CMS to meet growing business demands.

EDUCATION

Bachelor's of technology

01/2021 – 07/2024

Madhav institute of technology and science

Gwalior, Madhyapradesh

Computer Science Engineering

CGPA : 7.8

SKILLS

Frontend

Reactjs, Nextjs, JavaScript, tailwindCSS, HTML, CSS

Backend

Nodejs, Expressjs, Python, Nestjs, AWS, Docker, Java

Databases

Mongodb, MySQL, SQL

PROJECTS

Property dekho

08/2024 – 09/2024

Real estate | <https://github.com/889-dj/property-dekho>

- Developed a property listing platform using ReactJS, Node.js, Express, and MongoDB with JWT authentication.
- Built property search, user registration, and admin dashboard features.
- Designed RESTful APIs and integrated external APIs.
- Delivered a scalable, responsive system using Agile methodologies.

Brain burst

03/2024 – 05/2024

Learning management system | <https://github.com/889-dj/learning-management-system>

- Developed a scalable learning platform with Node.js, Express, and MongoDB.
- Built an interactive frontend using React.js and Next.js.
- Integrated Razorpay for payments and Redis for caching, improving performance.
- Implemented JWT authentication for secure access and data integrity.

Comfylsoth

01/2023 – 03/2023

E-commerce | <https://cumfysloth.netlify.app/>

- Engineered an E-Commerce platform
- Boosted performance by 20% using React.js, Redux Toolkit, Autho, JWT, Stripe, and Axios
- Optimized state handling and API interactions for a smooth user experience
- Integrated secure payment gateways and user authentication

CERTIFICATES

- Docker mastery(udemy)
- React (udemy)
- Machine learning(udemy)

ORGANIZATIONS

Asimov robotics club MITS

07/2021 – 05/2022

Lead Frontend developer

Gwalior, MP

- Created the Frontend of the Asimov website
- Conducted and judged hackathon organized by Asimov robotics club

ACHIEVEMENTS

5 star SQL/C++

07/2022

Hacker rank

SIH semi finalist

09/2023

AICTE
